<p>IG Index CFD Expiry</p>	<p>Please look for the information from "Get Info" in the particular contract on the platform.</p> <p>Positions in Platinum futures not already closed by the client expire automatically at the settlement price of a futures contract of the relevant metal on NYMEX on our last dealing day +/- IG dealing spread.</p>	<p>Not Applicable. Spot metals position remain open until you choose to close it. Separate daily funding adjustments are made for Spot Metals.</p>
<p>Rollover</p>	<p>For futures CFDs positions, unless expressly agreed otherwise with IG, positions will be rolled over to a later date by default. For most positions, a client can, before the position has been automatically closed, ask for the position not to be rolled over to a later date. Rolling over a position involves closing the old position and opening a new one. We normally attempt to contact a client shortly before a position is due to expire and offer the opportunity to roll the position over. However, we cannot undertake to do this in every case, and it remains the client's responsibility to communicate their roll preferences for any position(s) before expiry.</p> <p>Any futures CFD position that is not rolled over will settle on the expiry date based on the official closing price of the related expiry market, plus or minus half the IG spread, with the exception of CFDs on FTSE 100 and Wall Street futures, which expire without IG spread.</p> <p>Further details regarding the rolling of positions can be found in 'Rollover Rules' in the 'My Account' area of the platform. You can also enable automatic rollovers for all eligible futures contracts in this area.</p>	<p>Not Applicable</p>

IG PLATINUM COMMODITIES CFD PRODUCT DETAILS

Funding Cost	Not relevant	Funding adjustments are calculated and posted to the client's account daily. Funding adjustments are calculated based on the relevant tom-next spread, including an admin fee of 0.3% p.a. An adjustment is calculated for any position opened before 2200 that is still open after 2200 (London time).
Additional Notes	Our future contracts expire at specified future dates. There are no separate funding adjustments: a fair value is priced into our quotation.
