Rollover	<p>For futures CFDs positions, unless expressly agreed otherwise with IG, positions will be rolled over to a later date by default. For most positions, a client can, before the position has been automatically closed, ask for the position not to be rolled over to a later date. Rolling over a position involves closing the old position and opening a new one. We normally attempt to contact a client shortly before a position is due to expire and offer the opportunity to roll the position over. However, we cannot undertake to do this in every case, and it remains the client's responsibility to communicate their roll preferences for any position(s) before expiry.</p> <p>Any futures CFD position that is not rolled over will settle on the expiry date based on the official closing price of the related expiry market, plus or minus half the IG spread, with the exception of CFDs on FTSE 100 and Wall Street futures, which expire without IG spread.</p> <p>Further details regarding the rolling of positions can be found in 'Rollover Rules' in the 'My Account' area of the platform. You can also enable automatic rollovers for all eligible futures contracts in this area.</p>	Not relevant
Funding Cost	Not Relevant	Commodity funding is based on the market cost of carry including an admin fee of 2.5% per annum.
Additional Information	<p>Only liquid months will be available at any one time.</p> <p>We offer mini versions of our commodity contracts - with proportionately reduced margin requirements - at the following rates: 20% of main contract size</p>	Calculation for price and funding cost please check from http://www.ig.com/sg/commodities-trading
