IG US DOLLAR BASKET (CASH) CFD PRODUCT DETAILS

In-Hours Pricing Methodology	CFDs on indices are quoted with reference to the front month contract in the underlying futures market. The prices quoted for CFDs on futures, which are not on the front month contract, are adjusted for the fair value between that contract and the front month. Prices quoted for CFDs on the front month futures contract are not adjusted.
Out-of-Hours Pricing Methodology	During the out-of-hours sessions on 24 hour index markets, our quotations reflect our own view of the prospects for a market. This could include referring to price movements in other relevant markets which are open and any news flow relevant to that market. Furthermore, business done by other clients may itself affect our quotations. There may be nothing against which to measure our quotation at these times.
Interest Adjustment	Funding is based on the market cost of carry including an admin fee of 2.5% per annum.
Dividend Adjustment	Not Applicable
