Source: The data compiled in the table above has been retrieved from Bloomberg (6 February 2014)

Ratings definitions:

Outperform or Overweight: the contributing broker predicts the share price of a security will perform better than a specific benchmark

Under perform or Underweight: a security will fare worse than a specific benchmark

Upgrades and downgrades: a broker's last rating

Maintain: a broker has maintained or reiterated a recommendation

New ratings: an analyst has initiated coverage on a stock

Neutral or in-line recommendation: the broker expects a security's share price to match the performance of a benchmark

Price targets: the value a contributing broker expects the share price to reach (generally within a 12-month period). Recommendations are not always

accompanied by a price target

Last Price: the Market share price at the time of writing the update

Potential upside/downside: the 'potential' percentage gain or loss that could result if a contributing broker's price target is reached. The percentage gain or

loss is calculated based on the last price

Contributing broker: refers to the investment management firm providing the recommendation and price target
