## Ratings definitions:

Under perform or Underweight: a security will fare worse than a specific benchmark Upgrades and downgrades: a broker's last rating

Maintain: a broker has maintained or relevated a recommendation New ratings: an analyst has initiated coverage on a stock Neutral or in-line recommendation: the broker expects a security's share price to match the performance of a benchmark

Price targets: the value a contributing broker expects the share price to reach (generally within a 12-month period). Recommendations are not always accompanied by a price target Last Price: the Market share price at the time of writing the update Potential upside/downside: the 'potential' percentage gain or loss that could result if a contributing broker's price target is reached. The percentage gain or loss is calculated based on the last price Contributing broker: refers to the investment management firm providing the recommendation and price target
