Settlement	<p>You must ensure at all times that you are fully aware of the settlement reference price level and the referencing methods which are available in the "Get Info" tab under the particular product on the platform and also as detailed below.</p> <p>If the digital 100 statement is true, the price settles at 100. If it isn't true, it settles at 0. If the market finishes at the exact same value at the point of expiry, the digital 100 would be considered up, and the price would settle at 100. Your profit or loss depends on the amount per point you've staked, and the difference between your opening price and the digital 100's closing price.</p> <p>Daily US Crude OneTouch settles based upon the achievement of specified price levels as recorded by Bloomberg (E&OE). OneTouch levels are measured by reference to trades recorded by Bloomberg (E&OE) at any time between 08.00 and the first new print at 19.30 London time. The trade settles at 100 if Bloomberg prints the specified level between these times. Official expiry level will be treated as a trade between these times and will count towards settlement.</p>
