*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

IG is a reference to IG Markets Limited (a company registered in England and Wales under number 04008957) and IG Europe GmbH (a company incorporated in the Federal Republic of Germany and registered in the Frankfurt Trade Register under number HRB 115624), as the context requires. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. *The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

*The costs shown are intended to provide an overview about the cost structure of a transaction in the respective financial instruments based on a standardized investment amount. Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).

Non-transaction based costs such as for market access like MT4 or Taxes are not included here. Last update was november 2022. If single cost items are not shown, these products were not guaranteed to be tradeable at that relevant time. However, comparable products are included in the list. All prices, spreads are as of 4 pm CET with a holding period of 1 day plus 1 night and without a guaranteed stop being triggered. Commissions are calculated based on the more expensive type of deal (like phone deals vs. platform deal).
